Stereotactic Clinical Case Requirements

Overview

- Original Stereotactic Certification requires two clinical case submissions that must include the following.
- Please choose your cases carefully. Simple straight-forward, complete cases with complete documentation are best.
- 2D and 3D Cases are permitted.

Stereotactic Recertification requires one invasive, in situ or atypical ductal hyperplasia case submission including all elements.

Images 2D

Images <u>MUST</u> be labeled with case # and with title (example: "Case #1 Stereo View")

- ☐ Malignancy invasive or in situ, or atypical ductal hyperplasia *(at least one of the 2 cases)*
- ☐ Initial scout view, clearly showing the target lesion
- ☐ Stereotactic pair, demonstrating the lesion in the standard 15% offset views
- ☐ Stereotactic pair with the biopsy device in the pre-fire position, if applicable
- ☐ Stereotactic pair showing the biopsy device in the post-fire position
- ☐ Specimen radiograph, if applicable
- ☐ Stereotactic pair or post-procedure mammogram showing appropriate placement of the biopsy marker
- ☐ Pre-biopsy mammogram images; MLO, CC views as well as magnification views

Images 3D Tomosynthesis

Images <u>MUST</u> be labeled with case # and with title (example: "Case #1 Stereo View")

- ☐ Malignancy invasive or in situ, or atypical ductal hyperplasia *(at least one of the 2 cases)*
- ☐ Initial scout view, clearly showing the target lesion
- ☐ Prefire view with needle in position
- ☐ Specimen radiograph
- ☐ Post procedure Tomoview with marker in biopsy cavity OR Post biopsy mammogram with marker in appropriate position
- ☐ Pre-biopsy mammogram images; MLO, CC views as well as magnification views

Documentation

- ☐ Performed and documented breast exam
- ☐ Procedure Report to include:
    - o Right or left breast
    - o Location of lesion

- o Approach used to target and biopsy lesion
- o Prep
- o Local anesthetic
- o Type of biopsy device used
- o Result of specimen radiograph, if applicable
- o Marker placement, if any

☐ Relevant Pathology Report

☐ Mammogram Report

☐ Final Disposition/ Follow Up Plan
