Dallas, TX 75390

Didactic: 7:30 AM-12:45 PM
Mastotrainer and Cadaver Lab: 1:00 PM-3:45 PM

COURSE MODERATORS: Jennifer Gass, MD and Juliann Reiland, MD

FACULTY: Jennifer Gass, MD; Sadia Khan, DO; Katherine Kopkash, MD; Juliann Reiland, MD

COURSE DESCRIPTION:

This primer course is designed for general surgeons and breast surgeons who have not performed oncoplastic surgery. The morning lectures will provide information on beginner level strategies and techniques for delivering oncoplastic breast care related to breast conservation.

The afternoon session will provide a hands-on surgical cadaver skills lab including a Mastotrainer section for supervised practice of procedures taught in the morning lectures. Attendees will be assigned to stations to practice skin markings, cavity closure with glandular displacement, aesthetic scar placement, crescent mastopexy, inframammary fold crescent, and the donut therapeutic mastopexy. Attendees will be provided with required reading material prior to the course.

COURSE OBJECTIVES:

At the conclusion of this course, participants should be able to:

- Apply beginner level oncoplastic techniques and strategies in their practice
- Select the most appropriate oncoplastic procedures for individual patients
- Demonstrate familiarity with the latest technology to achieve optimal outcomes in oncoplastic surgery
