ANNUAL MEETING
PROGRAM

VISIT INVUITY AT BOOTH 517

“Eigr illumination technology enables me to do what I do when performing Nipple Sparing Mastectomies and Oncoplastic Breast Conservation procedures. It makes all the difference”

Invuity develops advanced medical devices to dramatically improve access and visualization in minimally invasive and minimal access breast surgery. The company's *Eikon* Breast Retractor System with Eigr Illumination Technology is specifically designed for breast surgery with substantial value in nipple sparing/skin sparing mastectomy and reconstruction, lumpectomy, and oncoplastic procedures. Invuity's Eigr Illumination Technology shapes illumination within the surgical field by broadly projecting thermally cool, brilliant light to uniformly illuminate deep incisions and provide unsurpassed visualization while virtually eliminating shadows and glare and minimizing thermal hazards.

CHICAGO
14th Annual Meeting
May 1-5, 2013

Dear colleagues,

Welcome to Chicago and the 14th Annual Meeting of The American Society of Breast Surgeons. Thanks to you, I am able to say that we have registered a record number of

Julie Margenthaler, MD, FACS

attendees for this event. Despite the fact that most of you have a schedule full of practice-related as well as family responsibilities, you continue to make this meeting a priority in your spring calendar. This ongoing commitment is a true testament to the dedication of our community. Over the next few days I will be reminded of that as I see hundreds of our attendees sit for hours on end listening to presentation after presentation, eager to learn the latest techniques and treatment strategies that will undoubtedly improve our patient care.

Many of you have arrived early to participate in the pre-meeting program. We are delighted that we have again been able to respond to your continuing demand for training in breast ultrasound and stereotactic breast procedures, while introducing two new courses this year, all again being led by a stellar faculty. Following the conclusion of the pre-meeting program on Thursday, the first of our general session events, the Coding and Reimbursement Symposium, will attempt to provide answers to your payment dilemmas. Later that evening, join your colleagues at the opening reception for a first look at the Exhibit Hall, while enjoying refreshments in a social atmosphere. You will also have numerous opportunities throughout the week,

especially during lunch and refreshment breaks, to visit with our nearly 70 exhibitors and see, and even try out, the latest in technology and resources available to breast surgeons. You may also want to consider several vendor-supported symposia that are being offered in conjunction with our meeting, including the official satellite symposium, Examining Locoregional Control in Early Breast Cancer, sponsored by pRIME Oncology, on Thursday, at 7:30 pm.

Our program starts extra early Friday morning for those of you who pre-purchased tickets to a breakfast workshop (all of which sold out), but we will officially open our general session and kick off the main event at 7:45 am. The agenda will feature a variety of programs and formats, including traditional presentations on local-regional management of breast cancer and advances in diagnosis and treatment, narrated videos of "How I Do It," debates on current controversies, oral research presentations, and an address by our president, Dr. V. Suzanne Klimberg, on "Treatment by Chance." Society members are encouraged to stay for the annual business meeting at 5:30 pm, after which you will want to visit the poster session and reception, where the researchers will be available to discuss their findings with you.

Saturday's highlight is sure to be the keynote address, "Breast Cancer: International Template for Bench and Translational Research," by Dr. Kirby Bland. However, we will also hear presentations on the management of locoregional and systemic recurrence and on benign breast diseases and high-risk lesions, the annual update on clinical

trials, a recap of the "best of" the San Antonio and ASCO meetings, a review of the "best papers" of 2012, and the views of our community tumor board. We'll also have an opportunity to learn more about the exciting research that is being done in our field during part 2 of our scientific session, as well as at lunchtime "quickshot" presentations. At the end of Saturday's educational programming, stop by our Society social, where we'll raise a toast to Dr. Klimberg, who will be concluding her term as our president at this meeting.

Early Sunday morning we will be celebrating this year's award recipients at the President's breakfast. Please join us in recognizing the incredible work presented by this year's winning researchers. They are playing a crucial role in advancing the care of our patients, and deserve the support of this community. Our meeting will conclude with presentations on genomics and molecular diagnostics, survivorship issues, and axillary management—all crucial components in keeping with our theme of showing how **Genomics, Research, Ethics, and Advances Translate** into improved care for your patients.

Most of all, I hope that as you head home from Chicago on Sunday that you will agree that the effort you have made to attend this year's meeting was well worth your while—that it was indeed a **GREAT** program.

Sincerely,

Julie Margenthaler, MD
14th Annual Meeting Program Chair

Meeting Objectives

Upon completion of this activity, participants should be able to

- Identify current treatment and management options for breast patients
- Assess available studies of breast patients

Target Audience

Surgeons with a special interest in the treatment of breast disease

Accreditation

The American Society of Breast Surgeons is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

Earn AMA PRA Category 1 Credit(s)TM Toward Part 2 of ABS Maintenance of Certification (MOC)

This year's general session and pre-meeting courses will not only provide opportunity for surgeons to earn *AMA PRA Category 1 Credit(s)TM*, but will also include the self-assessment activities necessary to claim *AMA PRA Category 1 Credit(s)TM* toward Part 2 of the American Board of Surgery (ABS) Maintenance of Certification (MOC) Program. These activities are identified in the agenda by this icon: **MOC**

To receive CME credit for this event, you must complete the Meeting Evaluation Form online at www.breastsurgeons.org no later than May 29, 2013. CME certificates will be mailed June 6, 2013.

AMA Credit Designation

PRE-MEETING COURSES

WEDNESDAY, MAY 1, 2013

Advanced Imaging and Technology in Breast Care Management

The American Society of Breast Surgeons designates this live activity for a maximum of **8.5 AMA PRA Category 1 CreditsTM**. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Stereotactic Breast Biopsy: An Introductory Course

The American Society of Breast Surgeons designates this live activity for a maximum of **8.25 AMA PRA Category 1 CreditsTM**. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Oncoplastic Margins: Techniques on the Fringe

The American Society of Breast Surgeons designates this live activity for a maximum of **7.75 AMA PRA Category 1 CreditsTM**. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

THURSDAY, MAY 2, 2013

Basic Breast Ultrasound: An Introductory Course

The American Society of Breast Surgeons designates this live activity for a maximum of **8 AMA PRA Category 1 CreditsTM**. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

High-Risk/Genetics/Molecular Diagnostics

The American Society of Breast Surgeons designates this live activity for a maximum of **7 AMA PRA Category 1 CreditsTM**. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

GENERAL SESSION

THURSDAY, MAY 2—SUNDAY, MAY 5

The American Society of Breast Surgeons designates this live activity for a maximum of **23.25 AMA PRA Category 1 CreditsTM**. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Disclosure Information

In compliance with ACCME Accreditation Criteria, The American Society of Breast Surgeons, as the accredited provider of this activity, must ensure that anyone in a position control the content of the educational activity has disclosed all relevant financial relationships with any commercial interest. All reported conflicts are managed by a designated official to ensure a bias-free presentation. General session disclosures are provided to all attendees in a separate handout. Satellite Symposium*

Examining Locoregional Control in Early Breast Cancer

5:30 pm–7:30 pm

Sheraton Chicago 4–7, Level 1V

This symposium will focus on emerging data regarding treatment decision-making and difficult clinical scenarios relevant to clinicians who provide care to patients with early-stage breast cancer, including ductal carcinoma in situ (DCIS). The scientific agenda will feature plenary lectures and interactive clinical questions utilizing an audience response system. This agenda will provide surgeons with practical insight from leading experts in the field and help improve the integration of new data into clinical practice. This educational activity is organized to create an atmosphere that maximizes learning opportunities for surgeons and other healthcare professionals who provide medical care for patients with breast cancer.

Upon completion of this educational activity, participants should be able to

- Identify patients with DCIS who might safely avoid radiation
- Predict the risk of recurrence based on gene expression in patients with DCIS
- Identify predictors of locoregional recurrence following neoadjuvant chemotherapy
- Identify lymph node positive breast cancer patients who might safely avoid chest wall or regional radiation based on gene expression profiles
- Determine the extent of axillary lymph node surgery following neoadjuvant chemotherapy
- Discuss the potential role of partial breast irradiation and potential risk of ipsilateral breast tumor recurrence in patients with early-stage breast cancer

**This satellite symposium is sponsored by Genomic Health and is not part of the official program of The American Society of Breast Surgeons. CME Credits for this program will be provided by pRIME Oncology. This activity is free to all registered attendees; however, pre-registration is required.*

Next-Day Access to General Session Presentations Available to Meeting Attendees

2013 meeting attendees will be able to view and/or download general session PowerPoint presentations (with some exceptions) via the Society website approximately 24 hours following each live presentation. To access, you must log onto www.breastsurgeons.org as a member or registered user and be a 2013 annual meeting registrant.

Free Online Access to Video Recordings of General Session for All Registered Attendees

Video recordings of each general session presentation, integrated with the PowerPoint presentations (with some exceptions), will be available online FREE to all meeting registrants approximately 2 weeks following the meeting. Providing materials online following the program ensures that attendees have access to the actual presentations used by each speaker onsite.
