Introduction

- We have previously shown that opioid-minimizing Breast Surgery ERAS (Enhanced Recovery After Surgery) Protocols eliminate the reflex narcotic prescription at discharge while providing superior pain control in lumpectomy and mastectomy patients.
- We sought to determine if the use of intraoperative ketorolac increases the risk of bleeding complications in breast surgery.

Methods

- Study:** Subset analysis of prospective, controlled cohort study of patients undergoing lumpectomy and mastectomy at a single institution
- Exclusion criteria:** Immediate reconstruction
- Study arms:**
 - Patients who received intraoperative ketorolac
 - Patients who did not received intraoperative ketorolac
- Outcomes:**
 - Primary: Bleeding complications (bruising, hematoma)
 - Secondary: Seroma, infection, dehiscence
- Analysis plan:** Complications compared using Fisher's exact test or t-test, and further analyzed by surgical modality

Results

Table 1. Patients Demographics and Treatment Characteristics

Characteristics (%)	No Ketorolac (n=99)	Ketorolac (n=115)	p-value
Female	97 (98)	111 (96.5)	0.688
Age	59.8 (20-94)	55.9 (16-88)	0.058
Any comorbidity	60 (60.6)	59 (51.3)	0.214
Cardiovascular	50 (50.5)	46 (40.0)	0.132
Diabetes	16 (16.2)	19 (16.5)	1.000
Obesity	9 (9.1)	15 (13.0)	0.393
Never-smoker	71 (71.7)	90 (78.3)	0.341
Current or past smoker	28 (28.3)	25 (21.7)	
Lumpectomy	59 (59.6)	98 (85.2)	<0.001
Mastectomy	40 (40.4)	17 (14.8)	
Proportion with malignancy:			
Total	76 (76.8)	61 (53.0)	<0.001
Lumpectomy	36 (61.0)	46 (46.9)	0.101
Mastectomy	40 (100)	17 (100)	1.000
Bilateral	8 (8.1)	8 (8.1)	0.883
No axillary surgery	37 (37.4)	70 (60.9)	
Sentinel node biopsy	46 (46.5)	40 (34.8)	<0.001
Axillary dissection	16 (16.2)	5 (4.4)	
Perioperative management:			
Preop acetaminophen	15 (15.2)	90 (78.3)	<0.001
Preop gabapentin	15 (15.2)	87 (75.7)	<0.001
Liposomal bupivacaine	29 (29.3)	93 (80.9)	<0.001

Results

Table 2. Complications Among All Patients

	No Ketorolac	Ketorolac	p-value
Any Complication	7 (7.1)	7 (6.1)	0.789
Any Major Complication ^a	6 (6.1)	4 (3.5)	0.519
Minor Complication	1 (1.0)	3 (2.6)	0.626
Seroma	2 (2.0)	1 (0.9)	0.597
Infection	1 (1.0)	0 (0)	0.463
Dehiscence	1 (1.0)	0 (0)	0.463
Bleeding Complication			
Any (Bruising or Hematoma)	2 (2.0)	3 (2.6)	1.000
Bruising	0 (0)	2 (1.7)	0.501
Hematoma	2 (2.0)	1 (0.9)	0.597

^aMajor complication: seroma, infection, dehiscence, bleeding

Table 3. Complications Among Lumpectomy Patients

	No Ketorolac	Ketorolac	p-value
Any Complication	1 (1.7)	4 (4.1)	0.651
Any Major Complication ^a	0 (0)	1 (1.0)	1.000
Minor Complication	1 (1.7)	3 (3.1)	1.000
Seroma	0 (0)	0 (0)	n/a
Infection	0 (0)	0 (0)	n/a
Dehiscence	0 (0)	0 (0)	n/a
Bleeding Complication			
Any (Bruising or Hematoma)	0 (0)	1 (1.0)	1.000
Bruising	0 (0)	1 (1.0)	1.000
Hematoma	0 (0)	0 (0)	n/a

^aMajor complication: seroma, infection, dehiscence, bleeding

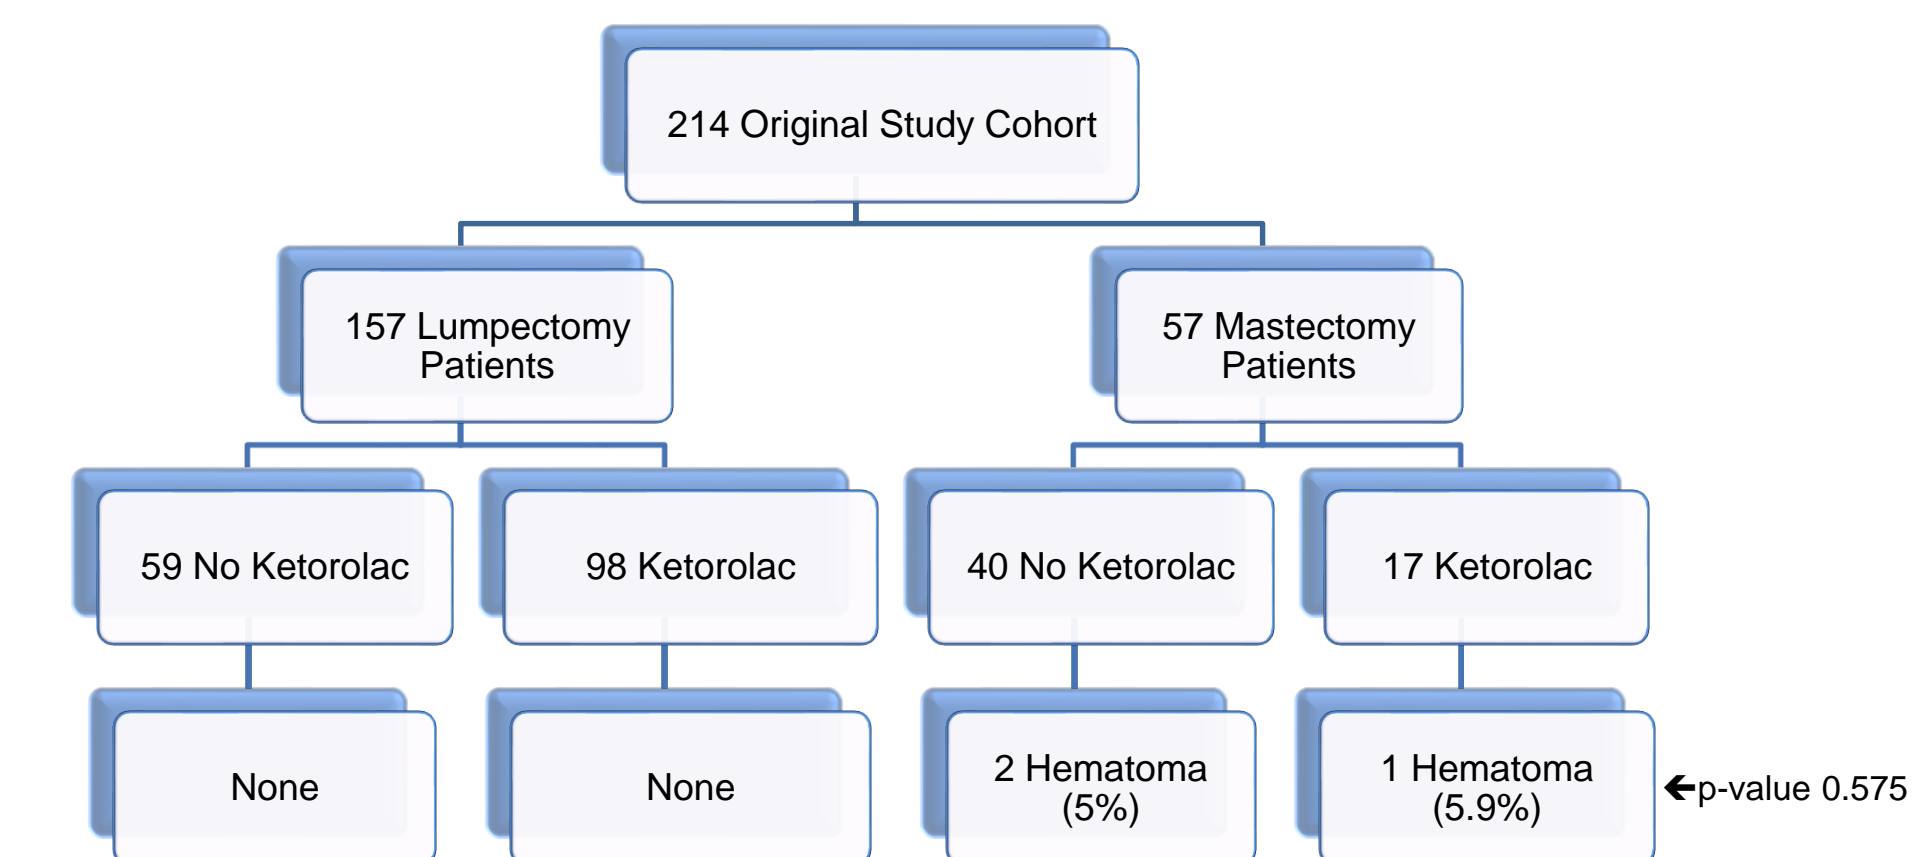

Table 4. Complications Among Mastectomy Patients

	No Ketorolac	Ketorolac	p-value
Any Complication	6 (5.0)	3 (17.7)	1.000
Any Major Complication ^a	6 (15.0)	3 (17.7)	1.000
Minor Complication	0 (0)	0 (0)	n/a
Seroma	2 (5.0)	1 (2.5)	1.000
Infection	1 (2.5)	0 (0)	1.000
Dehiscence	1 (2.5)	0 (0)	1.000
Bleeding Complication			
Any (Bruising or Hematoma)	2 (5.0)	2 (11.8)	0.575
Bruising	0 (0)	1 (5.9)	0.298
Hematoma	2 (5.0)	1 (5.9)	1.000

^aMajor complication: seroma, infection, dehiscence, bleeding

Results

Figure 1. Treatment Groups and Hematoma Rates

Important Results:

- When analyzed overall and divided by surgical modality, rates of any bleeding complications were similar (p=1.00)
- All hematomas required transfusion but were managed conservatively.
- Ketorolac dose (15 vs. 30 mg) did not correlate with bleeding risk.

Discussion

- Perioperative NSAIDs attenuate inflammatory response during and after surgery and may have anti-neoplastic effects, potentially improving oncologic outcomes.
- Intraoperative ketorolac does not increase risk of bleeding complications in breast surgery and should be incorporated into the perioperative pain management plan, especially in patients with breast cancer.
